Grades 7 - 12 Personal Technology

We ask that parents support their child with personal technology to be used daily in school. An expected increased demand on technology use within the school will likely mean that students will have frequent times where technology is not accessible to them if they do not possess their own devices. Students may use a variety of laptop style platforms (not phones) as long as they are wireless and can operate a GoogleChrome browser. One of the newest and most affordable machines is a Chromebook, please ensure it has:

- 2G of RAM - Webcam - QWERTY U.S. Keyboard or keyboard function
- Compatibility with both 802.11n and 802.11ac wireless networks
- Battery life of 5 hours or longer as charging stations are limited in the classrooms
- Capability of running Google Chrome browser

Several models of Chromebooks can be found in the \$300 dollar range or less and can frequently be found on sale at stores like Amazon and Staples.

PLEASE NOTE: Teachers may ask for additional supplies specific to their Classrooms.
